

EXHIBIT A

Listing of Claims:

Claim 24 (currently amended): An apparatus to electronically automate the sorting of chicken feet in the category of edible or inedible, comprising:

sensors including at least one photoelectric sensor and at least one inductive sensor for tracking the chicken bird in a shackle and chicken feet in a shackle;

a programmable logic card to track and store information received by said sensors;

a means to communicate between said sensors and said programmable logic card;

at least one inspector reject button communicating with said programmable logic card; and

a flag on at least two shackles. ~~at least one flag attached to a shackle.~~

Claim 25 (currently amended): A process to electronically automate the sorting of chicken feet in the category of edible or inedible, comprising:

sensing, with at least one photoelectric sensor and at least one inductive sensor, a chicken bird in a shackle and chicken feet in a shackle;

using a programmable logic card to track and store information received by said sensors;

communicating by a communication means between said sensors and said programmable logic card;

employing at least one inspector reject button communicating with said programmable logic card; and

using a flag on at least two shackles. ~~at least one flag attached to a shackle.~~
